BILIRUBINA DIRETTA FL

DD 2H100	4 x 20 + 2 x 10 ml
DD 6U420	6 x 56 + 6 x 14 ml

USO

Reagente per la determinazione quantitativa in vitro della bilirubina diretta nei fluidi biologici.

PRINCIPIO

La bilirubina conjugata (diretta) reagisce in ambiente acido con la 2,4-dicloroanilina diazotata, producendo un diazo composto intensamente colorato in rosso (520 - 560 nm). L'intensità del colore in soluzione è proporzionale alla concentrazione della bilirubina diretta.

COMPONENTI FORNITI

Solo per uso diagnostico in vitro.
I componenti del kit sono stabili fino alla data di scadenza indicata sulla confezione.
Conservare al riparo da luce diretta.

BIL D R1 2H100 4 x 20 ml (liquido) capsula bianca
6U420 6 x 56 ml (liquido) capsula bianca

Composizione: sodio cloruro 0.26 M, EDTA 0.1 mM.

BIL D R2 2H100 2 x 10 ml (liquido) capsula rossa
6U420 6 x 14 ml (liquido) capsula rossa

Composizione: EDTA 0.1 mM, 2,4-dichlorobenzene diazotato 0.1 mM, acido cloridrico 0.18 M.

Conservare i componenti del kit a 2-8°C.

PREPARAZIONE DEL REATTIVO

Utilizzare i reagenti separati.
Stabilità: fino a scadenza in etichetta a 2-8°C.
Stabilità dopo prima apertura: preferibilmente entro 60 gg. a 2-8°C il riparo dalla luce.

PRECAUZIONI

Il reagente può contenere componenti non reattivi e conservanti di varia natura. A scopo cautelativo è comunque opportuno evitare il contatto con la pelle e l'ingestione. Utilizzare le normali precauzioni previste per il comportamento in laboratorio.

KIT COMPONENTS

For in vitro diagnostic use only.

The components of the kit are stable until expiration date on the label.

Keep away from direct light sources.

BIL D R1 2H100 4 x 20 ml (liquid) white cap
6U420 6 x 56 ml (liquid) white cap

Composition: sodium chloride 0.26 M, EDTA 0.1 mM.

BIL D R2 2H100 2 x 10 ml (liquid) red cap
6U420 6 x 14 ml (liquid) red cap

Composition: EDTA 0.1 mM, diazotized 2,4-dichloroaniline 0.1 mM, hydrochloric acid 0.18 M.

Store all components at 2-8°C.

REAGENT PREPARATION

Use separate reagent ready to use.

Stability: up to expiration date on labels at 2-8°C.

Stability since first opening of vials: preferably within 60 days at 2-8°C away from light sources.

Caution: keep well refrigerated.

PRECAUTIONS

Reagent may contain some non-reactive and preservative components. It is suggested to handle carefully it, avoiding contact with skin and swallow.

Perform the test according to the general "Good Laboratory Practice" (GLP) guidelines.

SPECIMEN

Serum, plasma.

Specimens should be protected from direct exposure to light. Samples stored at 2-8°C in the dark are stable up to 3 days and 1 month at -20°C.

EXPECTED VALUES

adults:	≤ 0.20 mg/dl	(≤ 3.4 μ mol/l)
---------	--------------	---------------------

Each laboratory should establish appropriate reference intervals related to its population.

QUALITY CONTROL AND CALIBRATION

It is suggested to perform an internal quality control. For this purpose the following human based control sera are available:

QUANTINORM CHEMA

with normal or close to normal control values

QUANTIPATH CHEMA

with pathological control values.

If required, a multiparametric, human based calibrator is available:

AUTOCAL H

Please contact Customer Care for further information.

TEST PERFORMANCE

Linearity

the method is linear up to 13 mg/dl.

If the limit value is exceeded, it is suggested to dilute sample 1+9 with distilled water and to repeat the test, multiplying the result by 10.

Sensitivity/limit of detection (LOD)

the limit of detection is 0.039 mg/dl.

Interferences

No interference was observed by the presence of:
hemoglobin ≤ 50 mg/dl
lipids ≤ 500 mg/dl
ascorbic acid ≤ 30 mg/dl

Precision

intra-assay (n=10)	mean (mg/dl)	SD (mg/dl)	CV%
sample 1	0.719	0.003	0.44
sample 2	2.430	0.019	0.78

inter-assay (n=20)	mean (mg/dl)	SD (mg/dl)	CV%
sample 1	0.735	0.039	5.31
sample 2	2.456	0.105	4.26

Methods comparison

a comparison between Chema and a commercially available product gave the following results:

Bilirubin direct Chema = x
Bilirubin direct competitor = y
n = 110

$$y = 0.911x - 0.049 \text{ mg/dl} \quad r^2 = 0.995$$

WASTE DISPOSAL

This product is made to be used in professional laboratories.

P501: Dispose of contents according to national/international regulations.
